Drone Safety: Knowledge Check

1. The FLY RIGHT Framework

The FAA uses the **FLY RIGHT** acronym to help drone pilots remember the rules. Let's see how well you remember them!

Instructions: Fill in the missing words for each letter of the FLY RIGHT framework. Use the word bank below.

Word Bank:

Interact Safely | Gain Knowledge | Trust & Train | Have a Plan | Register

Letter	What it stands for
1. R	
2. I	
3. G	
4. H	
5. T	

2. Safe Flight Decisions

Instructions: Select the correct answer for each question below.

6. Which government agency creates the rules for flying drones in the United States?

- a) EPA
- b) FAA
- c) FBI
- d) NASA

7. You want to fly your drone at a busy park, directly over a crowd of people. Is this safe?

- a) Yes, if you fly very high.
- b) Yes, if you warn them.
- c) No, it's unsafe and against the rules.
- d) No, unless it's a large drone.

8. Before taking off, what is the best way to *Have a Plan*?

- a) Check the weather and use a preflight checklist.
- b) Just turn it on and see where it goes.
- c) Wait until it gets dark to avoid birds.
- d) Ask a friend to catch it when it lands.

9. What does it mean to *Trust & Train*?

- a) Trust the drone to fly itself.
- b) Trust that the weather will stay sunny.
- c) Train your dog not to chase the drone.
- d) Practice flying safely to build your skills.

10. What is the rule about keeping your drone in your "line of sight"?

- a) You only need to see it when taking off and landing.
- b) You must be able to see your drone with your own eyes at all times.
- c) You don't need to see it if it has a camera.
- d) You can use binoculars to keep it in sight.

Answer Key

1. The FLY RIGHT Framework

1. Register
2. Interact Safely
3. Gain Knowledge
4. Have a Plan
5. Trust & Train

2. Safe Flight Decisions

- b) FAA
- c) No, it's unsafe and against the rules.
- a) Check the weather and use a preflight checklist.
- d) Practice flying safely to build your skills.
- b) You must be able to see your drone with your own eyes at all times.
